

MOTO AIR wash on air filter

Store in a well-ventilated place, preferably outdoors.

Wear protective gloves and safety glasses when handling!

Instructions for use:

Pour the contents of this canister into the special container. Completely immerse the dirty filter in the cleaning liquid. Leave the filter soaked until it soaks like a sponge. After that, squeeze the cleaning liquid out of the filter thoroughly, but do not wring the filter. Repeat the process if necessary. The dark colour will now disappear from the filter. Check that all sand and any dirty particles have been removed from the filter. The remaining cleaning fluid may be poured out. Allow the washed filter to dry under a piece of cloth in a well-ventilated place (preferably outside). When the filter is completely dry, you can re-treat it with oil.

WARNING:

Keep out of reach of children. Do not breathe the fumes. Avoid contact with skin.

Harmful: may damage internal organs if swallowed. If swallowed, do not induce vomiting but seek medical attention immediately.

Dispose of the product environmentally at the end of its useful life.

Country of origin.
