K-BELT – KIDNEY BELT 0022774

1. Intended use

This product is intended for use when riding a motorcycle or bicycle. The kidney belt provides support and helps stabilise the lumbar area during sporting activities. The belt material also helps keep the lower back area warm.

The product does not replace other protective equipment intended for the relevant sport.

2. Limitations of use

Changes in environmental conditions, particularly temperature and humidity, may affect the properties of the product. Modifying the product, changing its original design or using it incorrectly may reduce its functionality.

Use the product only for its intended purpose and in accordance with these instructions. Do not modify the product in any way.

3. Pre-use inspection

Before each use, check that the product is complete, undamaged and in good condition. Pay particular attention to:

- condition of the material and seams
- condition and attachment of straps and support stays
- function of the hook-and-loop closure

If you notice damaged material, torn seams or a closure that does not work properly, do not use the product. If you have any doubts about its functionality, stop using it.

4. Choosing the correct size

Choose a size that matches the user's waist circumference. The belt must fit snugly and stay in place, but must not restrict breathing or freedom of movement.

5. Fitting and adjusting the belt

Before fitting, check that the product is complete and in good condition.

Position the kidney belt around the waist so that it fits correctly over the lumbar area. Fasten the hook-and-loop closure so that the belt stays securely in place without restricting breathing or movement. Before riding, check that the belt is correctly positioned and fastened.

There are two support stays on each side of the belt to help prevent it from slipping or rolling up.

6. Care, maintenance and storage

After use, allow the belt to dry in a well-ventilated place at room temperature. Do not tumble-dry it or place it near radiators or other heat sources.

The kidney belt may be gently washed in lukewarm water at a temperature of up to 30 °C. Allow it to air-dry after washing.

Store the product in a dry, well-ventilated place. Protect it from direct sunlight, prolonged exposure to extreme temperatures, excessive loads and deformation.

For disinfection, use only a spray intended for sports and motorcycle equipment that is suitable for the material.

Inspect the product regularly. If it is damaged or deformed, stop using it.

7. Disposal

At the end of its service life, dispose of the product in accordance with local waste-disposal regulations.

Keep the packaging out of reach of children to prevent the risk of suffocation.

8. Manufacturer and importer identification
